

Health & Safety Policy

Mayflower North West Ltd is committed to building a strong, positive and fair safety culture with safety at the heart of everything we do. We accept that we have a responsibility for providing and maintaining high standards for a safe and healthy working environment for our operatives and to ensure the safety of others affected by our operations and the services we provide.

Managing health and safety for our operations and services is controlled by Mayflower North West, and has been developed from the CITB Publication GE700. This document also includes best practice notes to assist in the process of compiling risk assessments. It is regularly updated with information in the light of changes to legislation, accident reviews and the performance of the industry generally. At least one copy of the document is to be held at our office and on each site and is available for reference by all members of the construction team.

We pursue this commitment by:

- Applying a risk-based approach to continually improving our performance, setting objectives and targets as part of our overall business strategy.
- Complying with the Health and Safety at Work Act 1974 and relevant legislation and, where practical, with codes of practice, industrial standards and other requirements, such as those specified by our clients.
- Providing appropriate information and supervision to ensure that personal responsibilities are discharged in a safe, reliable and competent manner.
- Providing adequate funding and resources that contribute towards a safe and healthy working environment.
- Maintaining management systems to meet the requirements of the CITB Construction site safety procedures.
- Promoting good practice across Mayflower North West Ltd.

We look to our Operatives and supply chain for support and professionalism in making this policy effective on behalf of Mayflower North West.
