

SUSTAINABILITY POLICY STATEMENT

Our company strives to deliver the broader sustainability strategy through, ensuring we address all the potential impacts our business and projects have on the environment and society. They cascade our sustainability objectives and targets through the company. All our projects have a project specific management plan as part of company policy, which ensures, where necessary that projects identify sustainability issues and opportunities in a Sustainability Action Plan. Once these have been identified it becomes part of the process which enables us to determine our success in managing sustainability.

Throughout this process we need to ensure that we have meaningful consultation and dialogue with our Clients, Suppliers, Sub-Contractors.
